<div align="center">⬜ Bravo, Cyber Hero! ⬜</div>

You cracked the code...

Unveiled the secrets...

And proved to the world that no hidden trail is too complex for a true defender! ♂

This was no ordinary game —

It was a realistic journey into the dark corners of cybercrime,

where attackers hide behind innocent images,

embed traps in plain sight,

and deceive users with subtle clues...

But you?

You saw through the noise.

You thought like an investigator.

And you acted like a protector.

 That's what makes a true cyber hero.

⬜ You've officially earned your badge of honor:

⬜ FLAG:

Let it remind you

You're not just a player.

You're now part of an elite force

that detects, deciphers, and defeats digital threats.

⬭ Because in the world of cyber warfare...

Not all heroes wear capes.

Some wield firewalls.

Others build traps for the attackers.

But you...

You lead the charge.

 Keep going, defender.

⬜ **Hint:**
In cybersecurity, not everything is *visible*.
Some flags are **right in front of you** if you **look closely enough**. ♂

The cyber world needs champions like you.
